

Updating Cento Flash Reports

Cedaron periodically adds and updates the built-in Cento flash reports. When new flash reports are released by Cedaron, a CardiacCare admin will have to log into Cento Analytics and update the flash reports in the organization's Cento Analytics instance.

How to Download/Update Flash Reports

Follow these steps to download/update flash reports:

1. Launch **Cento Analytics**. This is done in CardiacCare by hovering over **Utilities** in the menu bar, then selecting **Analytics**.

🌲 🖪 E	
cmi_ebekir	bekir
	-

2. Go to **Administration**. Can click on either Administration, in the Cento menu bar or the Cento home screen dashboard (both highlighted in red below).

Manage Flash Reports			
Flash Report updates are released regularly. This page allows your site to download the latest Flash Report Definitions for both the standard Flash Reports and any custom Flash Reports developed for your site. If your copy of Cento Analytics has internet access, there is a single click to update Flash Reports. Otherwise, there is a link to download and upload the latest update package.
