CEDARON

Cedaron Training. CONFIDENTIAL.

Muneesh has built more than 400 ready-to-go reports, what we call “Flash Reports”.

You can now find Flash Reports for all NCDR metrics, including those for the STS/ACC TVT Registry.

How to find Flash Reports

- In CardiacCare, go to Utilities > Analytics
- Click on the “Flash Reports” button to jump directly to the list.

By default, the list displays 100s of reports across many pages.

How to filter Flash Reports

Use the “Report Tag Filter” to narrow the list by Registry.

- Click on the Report-Tag Filter drop-down
- Select the Registry (for example, CathPCI v5 or STS Adult Cardiac Care 4.20)

The list of reports will now filter to the selected registry.

How to change the number of Flash Reports per page

If the list exceeds 10 Flash Reports, it’s separated into pages. A quick way to see all reports is to change the Display records per page value.

- Click on the Display dropdown and select 1000. This will list all reports on single page.

How to open and run multiple reports at the same time

Like other web-application links, Flash Reports can be opened in separate tabs by one of these methods:

- Click the report link while holding the CTRL key. This will open the link in a new tab.
- Right-click the report link and then click on “Open Link in New Tab”.

How to search for Flash Reports by name

- Use the Search text box on the top right.

The list will filter by matching text found anywhere in the report name.
