

Introduction to the (New) Patient Chart/Tree

We are excited to announce a complete redesign of the Patient Chart page!

This update has been rebuilt from the ground up to deliver a more intuitive, information-rich experience while keeping the familiar layout you already know. Episodes, visits, and data form records remain on the left, with detailed information on the right, but now with clearer visuals and more data available at a glance.

How to navigate the New Patient Chart/Patient Tree

The example below shows a new patient that was created, and the user is being directed to add an Episode. After adding the necessary data, select **Save**.

Add Episode
